

Locomotive Inspection Report
(Other Than Steam)

Unit Number 52

Initials PHD

PORT HURON AND DETROIT RAILROAD

INSTRUCTIONS: Each locomotive unit in use must be inspected at least once during each calendar day, and a report made on this form, whether needing repairs or not. If any defects are reported which constitute a violation of the Locomotive Inspection Law, or any Interstate Commerce Commission rules and regulations thereunder, such defects must be repaired before the unit is again used in service and proper notation must be made on this report to indicate that such repairs have been made. This report must be approved by proper authority and filed at the terminal at which the locomotive unit is cared for.
